WORK EXPERIENCE

ACL Digital, Bangalore Software Engineer

Feb 2022 - Present

As a Software Engineer at ACL Digital, focusing on Front-end and back-end development projects.

Key Responsibilities:

- Understand client needs thoroughly.
- Code efficiently following SOPs.
- Conduct rigorous testing for quality assurance.
- Adapt and improve solutions based on feedback and trends.

Projects:

• Glass Detection (Client - PepsiCo)

Objective: The objective of this project is to implement a robust safety glass detection system within PepsiCo factories to ensure that workers adhere to safety protocols by wearing appropriate safety glasses.

- Placement of high-resolution cameras at strategic locations across the factory floor to capture images of workers entering and moving within the premises.
- Training the algorithm using machine learning techniques on a dataset of images containing workers with and without safety glasses.
- Integration with existing security systems to trigger alerts or notifications in such instances.

• ACL Chat (Internal Project)

Objective: The objective of this project is to develop a comprehensive chat and marketplace platform exclusively for ACL Digital employees.

- Real-time messaging functionality for one-on-one and group conversations.
- Privacy settings to control visibility of profile information and listings.
- Keyword-based search with filters for refining results.
- API endpoints for potential integration with external systems or services.

• Create Web Page (Internal Project)

Objective: Develop static web pages to showcase the company's products, services, and brand identity.

- A welcoming introduction to our company, highlighting key services, achievements, and values.
- A comprehensive overview of our company's history, mission, vision, and team.
- Detailed descriptions of the services we offer, including any specialisation or unique features.
- Showcase of past projects, case studies, or client testimonials to demonstrate our capabilities.
- A convenient means for visitors to reach out to us, including a contact form and essential contact information.

• DXC (POC)

- Planning & Data Gathering: Define objectives and collect relevant data.
- Model Development & Integration: Develop AI/ML models and integrate them.
- Demonstration & Evaluation: Showcase and assess the AI/ML applications.
